

Project Detail										
Project Name	orangehrmutive	Browser Version		Build No.	1.0.0	Module Name	Login Page	Test Case ID	TC-001	Test Description
Assignment	QA-Nodes	Cross Browser Testing		Chrom Edge FireFox		Assigned By	Suresh sir	Created Date	15-Dec-25	Last Modified
TS-ID	TS-DESC	TC-ID	TC-DESC	TEST DATA	TEST STEPS	EXPECTED RESULTS	ACTUAL RESULT	STATUS	ATTACHMENT	REMARKS
TS-01	Check that Login Functionality is working fine or not.	TC-01	Check that both the fields (Username and Password) are editable or not.	Login URL	Step 1 : Click on the URL. Step 2 : Click on both the Fields.	It should be editable.	As Expected.	FAIL		
		TC-02	Check that both the fields (Username and Password) are accepting blank data or not.	Login URL	Tested Data = '' / Blank Step1 : Click on both the fields and Enter blank space. Step 2 : Click on the Login Button.	It should not accept blank value	As Expected.	PASS		
		TC-03	Verify that the login should work with the valid username and password.	Login URL Tested Data UN = Admin PWD = admin123	Step 1 : Click on the both the fields and Enter valid UN and Password. Step 2 : Click on the Login button.	It should accept valid data.	As Expected.	PASS		
		TC-04	Verify that the login shouldn't work with the invalid username and password.	Login URL Tested Data UN = invalidUser PWD = wrongpassword	1. Open Login URL 2. Enter invalid username and password 3. Click Login button	Login should fail and display an appropriate error message.	As Expected.			
		TC-05	Verify that the login page has a user-friendly and intuitive design with clear labels for the username and password fields and a visible login button.	Login URL	1.Open the application URL 2.Wait for the login page to load completely 3.Observe the page layout 4.Check the Username field label 5.Check the Password field label 6.Check the UI elements 7.Verify the Login button 8.Check the tab order. 9.Ensure there are no overlapping UI elements, misalignments, or cut-off text. 10.Verify responsiveness.	As per TC description: success or appropriate error/lockout message depending on case.	As Expected.			
		TC-07	Test the login functionality on a variety of different username and password combinations, including special characters and long strings to ensure it is robust and can handle a wide range of inputs.	Login URL	1.Open the application URL in a supported browser. 2.Wait for the login page to load completely. 3.Prepare a list of different username and password combinations. 4.Enter each username and password combination. 5.Click on the Login button or press Enter. 6.Observe the system behavior for each input combination. 7.Repeat steps 4-6 for all combinations in the test data set. 8.Note system responses. 9.Verify error messages. 10.Ensure system does not accept invalid or suspicious inputs. 11.Check that no unexpected behaviors occur. 12.Log results.	As per TC description: success or appropriate error/lockout message depending on case.	As Expected.			
		TC-08	Test the login functionality on different web browsers(e.g Chrome, Firefox, Safari, Internet Explorer) to ensure compatibility.	Login URL	1. Open Login URL 2. Prepare account state as required (e.g., suspended/locked) 3. Enter credentials 4. Click Login 5. Observe behavior and messages		As Expected.			
		TC-09	Test the login functionality on different mobile devices (iPhone, Android phone) to ensure it is responsive and mobile-friendly.	Login URL						
		TC-10	Test the login functionality with different keyboard layouts(QWERTY, AZERTY, QWERTZ, COLEMAK) to ensure it works with different input methods.	Login URL						
		TC-11	Test the login functionality with different types of internet connections(e.g WiFi, 5G, 4G, 3G, 2G, broadband) to ensure it works with different network speeds.	Login URL						
		TC-12	Test the login functionality with different screen sizes and resolutions to ensure it is properly displayed on different devices.	Login URL						
		TC-13	Test the login functionality with the "capslock" key turned on and off and verify that it does not affect the ability to log in.	Login URL						
		TC-14	Test the login functionality with the autocomplete feature turned on and off, and verify that it does not affect the ability to log in.	Login URL						
		TC-15	Test the login functionality with different languages selected, and verify that the login page is properly translated and displayed in the selected language.	Login URL						
		TC-16	Test the login functionality with the "Accessibility mode" turned on, and verify that the login page is properly displayed and can be used by users with disabilities.	Login URL						
		TC-17	Test the login functionality with the "Dark mode" turned on, and verify that the login page is properly displayed and can be used in dark environments.	Login URL						
		TC-18	Test the login functionality with the "Private mode" turned on, and verify that the login page is properly displayed and the user's login information is not stored in the browser's history.	Login URL						
		TC-19	Test the login functionality with different combinations of username and password that are valid and associated with any existing user account, and verify that the user is unable to login with such combinations.	Login URL
